

GLOBAL FOREST RESOURCES ASSESSMENT 2015

COUNTRY REPORT

Uzbekistan

Rome, 2014

FAO, at the request of its member countries, regularly monitors the world's forests and their management and uses through the Global Forest Resources Assessment (FRA). This country report is prepared as a contribution to the FAO publication, the Global Forest Resources Assessment 2015 (FRA 2015).

The content and the structure are in accordance with the recommendations and guidelines given by FAO in the document Guide for country reporting for FRA 2015 (<http://www.fao.org/3/a-au190e.pdf>). These reports were submitted to FAO as official government documents.

The content and the views expressed in this report are the responsibility of the entity submitting the report to FAO. FAO may not be held responsible for the use which may be made of the information contained in this report.

TABLE OF CONTENTS

| | |
|--|----|
| Report preparation and contact persons..... | 4 |
| 1. What is the area of forest and other wooded land and how has it changed over time? | 6 |
| 2. What is the area of natural and planted forest and how has it changed over time? | 14 |
| 3. What are the stocks and growth rates of the forests and how have they changed? | 19 |
| 4. What is the status of forest production and how has it changed over time? | 29 |
| 5. How much forest area is managed for protection of soil and water and ecosystem services? | 36 |
| 6. How much forest area is protected and designated for the conservation of biodiversity and how has it changed over time? | 41 |
| 7. What is the area of forest affected by woody invasive species? | 44 |
| 8. How much forest area is damaged each year? | 47 |
| 9. What is the forest area with reduced canopy cover? | 51 |
| 10. What forest policy and regulatory framework exists to support implementation of sustainable forest management SFM? | 52 |
| 11. Is there a national platform that promotes stakeholder participation in forest policy development? | 55 |
| 12. What is the forest area intended to be in permanent forest land use and how has it changed over time? | 56 |
| 13. How does your country measure and report progress towards SFM at the national level? | 59 |
| 14. What is the area of forest under a forest management plan and how is this monitored? | 61 |
| 15. How are stakeholders involved in the management decision making for publicly owned forests? | 63 |
| 16. What is the area of forest under an independently verified forest certification scheme? | 64 |
| 17. How much money do governments collect from and spend on forests? | 66 |
| 18. Who owns and manages the forests and how has this changed? | 68 |
| 19. How many people are directly employed in forestry? | 73 |
| 20. What is the contribution of forestry to Gross Domestic Product (GDP)? | 75 |
| 21. What is forest area likely to be in the future | 76 |

Report preparation and contact persons

Introductory Text

Place an introductory text on the content of this report

The territory of the Republic of Uzbekistan covers an area of 44,410.3 thousand hectares, where over 30 million people are living. Uzbekistan is most populated country in the Central Asian region. Up to 80% of the total lands are occupied by steps and deserts. The territory of the Republic of Uzbekistan covers an area of 44,410.3 thousand hectares, where over 30 million people are living. Uzbekistan is most populated country in the Central Asian region. Up to 80% of the total lands are occupied by steps and deserts.

The Republic of Uzbekistan is a forest-poor country. The state forest stock is 21,7% of the total area of Uzbekistan, which is 9,6 mln. ha. From this, covered with forest consists of 3.3 mln. ha which 7,5% of the total area of the country. 86% forests of Uzbekistan situated in the desert zone. (According the National report on Land resources of Uzbekistan) Uzbek forests are of the greatest importance and contribute to the development of Uzbekistan. A particular importance of forests includes combating desertification and natural disasters prevention (e.g. mudflows, floods, droughts, etc.), and also improving the environmental situation. Uzbekistan's transition to market economy substantively impacted on the Uzbek forestry sector. However, its legislation, human resources and financial policies do not adequately address to the present challenges that results in reduced efficiency of forestry's contribution into the national economy and peoples' welfare.

The Main Administration on Forestry (MAF) #was established in 2000 on the basis of the former State Committee for Forestry. Currently MAF is a subdivision of the Ministry of Agriculture and Water Resources. It coordinates activities implemented by 79 forestry enterprises, 6 specialized forest enterprises, 9 forest experimental stations, 8 natural reserves, 5 hunting enterprises, 2 national park and 1 Biosphere Reserve. Moreover, MAF supervises the Republican Scientific and Production Center of Landscape-Gardening and Forestry, Department of Reserves, National Parks and Hunting Enterprises, Survey and Production Center for Non wood Forest Products (Shifobakhsh"), Republican Production Forest Seeds Center, Republican Training and Production Center on Upgrading Skills, design and exploration forest regulation state-running enterprise "Uzgirolesproject".

Check "yes" if this survey is a Desk Study, "no" otherwise

Desk Study?

no

1. What is the area of forest and other wooded land and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

1.1 Categories and definitions

| Category | Definition |
|--|---|
| Forest | Land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 percent or trees able to reach these thresholds in situ. It does not include land that is predominantly under agricultural or urban land use. |
| Other wooded land | Land not classified as "Forest" spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of 5-10 percent or trees able to reach these thresholds ; or with a combined cover of shrubs bushes and trees above 10 percent. It does not include land that is predominantly under agricultural or urban land use. |
| Other land | All land that is not classified as "Forest" or "Other wooded land". |
| ...of which with tree cover (<i>sub-category</i>) | Land considered as "Other land", that is predominantly agricultural or urban lands use and has patches of tree cover that span more than 0.5 hectares with a canopy cover of more than 10 percent of trees able to reach a height of 5 meters at maturity. It includes both the forest and non-forest tree species. |
| Inland water bodies | Inland water bodies generally include major rivers, lakes and water reservoirs. |
| Forest expansion | Expansion of forest on land that, until then, was not defined as forest. |
| ...of which afforestation (<i>sub-category</i>) | Establishment of forest through planting and/or deliberate seeding on land that, until then, was not defined as forest. |
| ...of which natural expansion of forest (<i>sub-category</i>) | Expansion of forests through natural succession on land that, until then, was under another land use (e.g. forest succession on land previously used for agriculture). |
| Deforestation | The conversion of forest to other land use or the longterm reduction of the tree canopy cover below the minimum 10 percent threshold. |
| ...of which human induced (<i>sub-category</i>) | Human induced conversion of forest to other land use or the permanent reduction of the tree canopy cover below the minimum 10 percent threshold. |
| Reforestation | Natural regeneration or re-establishment of forest through planting and/or deliberate seeding on land already in forest land use. |
| ...of which artificial reforestation (<i>sub-category</i>) | Re-establishment of forest through planting and/or deliberate seeding on land already in forest land use. |

1.2 National data

1.2.1 Data sources

| | References to sources of information | Variables | Years | Additional comments |
|---|--|---|------------------------|---------------------|
| 1 | Land Fund of the Republic of Uzbekistan (Uzbekiston Respublikasining Er Fondi) | Total land area, total area of state forest resources | 1990, 2000, 2005, 2008 | N/A |

| | | | | |
|---|---|--|------------------------|-----|
| 2 | Distribution of the State Forest Resources as to Land Categories | Forest land, non-forest land | 1990, 2000, 2005, 2008 | N/A |
| 3 | Annual Report of the Main Forestry Department Ministry of Agriculture and Water Resources of the Republic of Uzbekistan | Land covered by forests, free-growing forest lands, forest plantations and nurseries | 1990, 2000, 2005, 2008 | N/A |
| 4 | FAOSTAT | Total land area | N/A | N/A |

1.2.2 Classification and definitions

| National class | Definition |
|--------------------------------|--|
| Covered by forest | Forests with closed crowns, where the need of care of soil is not required, the height of trees and annual growth of the last year corresponds to criteria of the Table of Quality Estimation for the main species, regular arrangement of the main species; young forests |
| • including forest plantations | Forest stands and plantations planted for protective and industrial purposes, and for forest restoration |
| Sparse forest stands | Single trees and trees combined with bushes, not corresponding to standards, crowns without required density and closing of crowns, insufficient annual growth and non-regular arrangement of the main species |
| Forest nurseries | Land assigned for growing of plantings in the special places, not in the forests. Seedlings and graftings are grown on these lands until they are not replanted to forests, usually during one-three years depending on species. |
| Uncovered by forest | Sites of: forest fires, glades, clearings, waste lands uncovered by trees and bushes |
| N/A | Non-forested land |
| Other land | Land assigned for agricultural area, hay fields, pastures, arable land, farms, wetlands, glaciers etc. |
| Gardens and vineyards | Gardens and vineyards |
| Water reservoirs | Main rivers, lakes and water reservoirs |
| Afforestation | Establishment of forest through planting and/or deliberate seeding on land that, until then, was not classified as forest. |
| Reforestation | Re-establishment of forest through planting and/or deliberate seeding on land classified as forest. |
| Natural expansion of forest | Expansion of forests through natural succession on land that, until then, was under another land use (e.g. forest succession on land previously used for agriculture). |

1.2.3 Original data

| Forest area | | | | |
|--------------------------------|-----------------------------|-------------|-------------|-----------------|
| National Class | Area (1000 hectares) | | | |
| | 1990 | 2000 | 2005 | 2008 |
| Forested land | | | | |
| Covered by forest | 1895.3 | 3210.9 | 3294.0 | 3244.1 |
| • including forest plantations | 222.4 | 413.3 | 533.8 | 608.4 |
| Sparse forest stands | 1306.1 | 1594.7 | 904.1 | 824.3 |
| Forest nurseries | 0.7 | 0.9 | 1.0 | 0.7 |
| Uncovered by forest | 1781.6 | 2158.6 | 993.7 | 249.6 |
| Non-forested land | | | | |
| Other land | 37180.3 | 33933.3 | 35715.9 | 39747.6 |
| Gardens and vineyards | 308.2 | 361.4 | 348.1 | 344.0 |
| TOTAL | 42472.2 | 41259.8 | 41256.8 | 44410.3* |

* Official land area of the Republic of Uzbekistan indicated as 44410.3 thousand hectares in the National Report on Land Resources of the Republic of Uzbekistan.

Forest expansion, deforestation, reforestation

| National class | Area (1000 hectares) | | | |
|--|----------------------|------|------|------|
| | 1990 | 2000 | 2005 | 2008 |
| Afforestation | 15 | 19 | 22 | 15.5 |
| ...of which dried area of Aral | 10 | 17.7 | 20.5 | 15 |
| Reforestation | 12 | 15.5 | 12 | 13.3 |
| Natural expansion of forest | 3 | 6.5 | 8 | 13.4 |
| Total | 30 | 41 | 42 | 42.2 |
| Annual forest establishment of which of introduced species (hectares/ years) | - | - | - | - |

1.3 Analysis and processing of national data

1.3.1 Adjustment

| Forest area |
|---|
| Official land area of the Republic of Uzbekistan indicated as 44410.3 thousand hectares in the National Report on Land Resources of the Republic of Uzbekistan. Official area of Water fund land is 815.8 thousand hectares. As the both values differ from the data available at FAOSTAT, area of other land was adjusted accordingly in order to make national data consistent. |

1.3.2 Estimation and forecasting

| Forest area | | | | | | | | |
|--|----------------|--------------|--------------|--------------|--|--|--|--|
| The national classes “Forest nurseries”, “Covered by forest” with sub-category “Including plantations” for the year 2000 and 2005 is used to extrapolate the 1990 figure. | | | | | | | | |
| <table border="1"> <thead> <tr> <th>National class</th> <th>Area,(1990)</th> <th>Area, (2000)</th> <th>Area, (2005)</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table> | National class | Area,(1990) | Area, (2000) | Area, (2005) | | | | |
| National class | Area,(1990) | Area, (2000) | Area, (2005) | | | | | |
| | | | | | | | | |

| Forested land | 1000 Ha | | |
|--------------------------------|---------|--------|--------|
| Covered by forest | 3045 | 3210.9 | 3294.0 |
| • including forest plantations | 172.3 | 413.3 | 533.8 |
| Forest nurseries | 0.7 | 0.9 | 1.0 |

1.3.3 Reclassification

| National Class | Area (1000 hectares) | | | |
|---|----------------------|-------------------|----------------------------|--------------|
| | Forests | Other wooded land | Other land with tree cover | Inland Water |
| Percentage | % | % | % | % |
| Covered by forest, including forest plantations | 100 % | | | |
| Sparse forest stands | | 100% | | |
| Forest nurseries | 100% | | | |
| Uncovered by forest | | | 100% | |
| Other land | | | 100% | |
| Gardens and vineyards | | | 100% | |

1.4 Data

Table 1a

| Categories | | Area (000 hectares) | | | | |
|---|-------------------|---------------------|--------|------|--------|--------|

|-------------------|-----------------|-------------------------|
| Forest | Tier 2 | Tier 2 |
| Other wooded land | Tier 2 | Tier 2 |
| Forest expansion | Tier 3 | Tier 3 |
| Deforestation | Tier 2 | Tier 2 |
| Reforestation | Tier 3 | Tier 3 |

Tier criteria

| Category | Tier for status | Tier for reported trend |
|----------|-----------------|-------------------------|
|----------|-----------------|-------------------------|

| | | |
|---|--|--|
| <ul style="list-style-type: none"> • Forest • Other wooded land • Afforestation • Reforestation • Natural expansion of forest • Deforestation | <p>Tier 3 : Data sources: Either recent (less than 10 years ago) National Forest Inventory or remote sensing, with ground truthing, or programme for repeated compatible NFIs Tier 2 : Data sources: Full cover mapping / remote sensing or old NFI (more than 10 years ago) Tier 1 : Other</p> | <p>Tier 3 : Estimate based on repeated compatible tiers 3 (tier for status) Tier 2 : Estimate based on repeated compatible tier 2 or combination tier 3 and 2 or 1 (tier for status) Tier 1 : Other</p> |
|---|--|--|

1.5 Comments

| Category | Comments related to data definitions etc | Comments on the reported trends |
|----------------------------|---|--|
| Forest | <p>There are large inconsistencies in the national classification of original data for the period 1990-2008. The main discrepancy is found in the classification of national classes "Covered by forest", "Sparse forest stands" and "Uncovered by forest". It is evident that the classification of "Sparse forest stands" and "Uncovered by forest" in 1990 are including large areas that are classified as "Covered by forest" in 2008. In order to generate a consistent time series for FRA 2010 reporting the most recent (2008) classification has been applied. It is assumed that the areas of "Forest nurseries", "Covered by forest" and the sub-category "Including plantations" for the year 2000 are consistent with 2008. However, due to insurmountable differences in the other categories it is not possible to create consistent time-series.</p> | <p>There was a severe drought during 2005-2008. For this reason, it caused the decrease of forests in the country.</p> |
| Other wooded land | N/A | N/A |
| Other land | <p>For calibration the FAOSTAT data were used. The calibration was applied only to the "Other land" category, because the area of the country is changed as a result of returning of the lands rented from other countries.</p> | N/A |
| Other land with tree cover | N/A | N/A |
| Inland water bodies | <p>Official area of Water fund land is 815.8 thousand hectares and significantly differs from the values available in FAOSTAT database - 2200 thousand ha.</p> | N/A |
| Forest expansion | N/A | N/A |
| Deforestation | N/A | N/A |
| Reforestation | N/A | N/A |

Other general comments to the table

Official land area of the Republic of Uzbekistan indicated as 44410.3 thousand hectares in the National Report on Land Resources of the Republic of Uzbekistan (01.01.2013). Currently, Main Department of Forestry developed TCP project proposal with FAO to carry out forest inventory. Nowadays, Main Department of Forestry is searching for additional funding sources to carry out this activity.

2. What is the area of natural and planted forest and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

2.1 Categories and definitions

| Term | Definition |
|---|---|
| Naturally regenerated forest | Forest predominantly composed of trees established through natural regeneration. |
| Naturalized introduced species | Other naturally regenerated forest where the tree species are predominantly non-native and do not need human help to reproduce/maintain populations over time. |
| Introduced species | A species, subspecies or lower taxon occurring outside its natural range (past or present) and dispersal potential (i.e. outside the range it occupies naturally or could occupy without direct or indirect introduction or care by humans). |
| Category | Definition |
| Primary forest | Naturally regenerated forest of native species where there are no clearly visible indications of human activities and the ecological processes are not significantly disturbed. |
| Other naturally regenerated forest | Naturally regenerated forest where there are clearly visible indications of human activities. |
| ...of which of introduced species (<i>sub-category</i>) | Other naturally regenerated forest where the trees are predominantly of introduced species. |
| ...of which naturalized (<i>sub-sub category</i>) | Other naturally regenerated forest where the trees are predominantly of naturalized introduced species. |
| Planted forest | Forest predominantly composed of trees established through planting and/or deliberate seeding. |
| ...of which of introduced species (<i>sub-category</i>) | Planted forest where the planted/seeded trees are predominantly of introduced species. |
| Mangroves | Area of forest and other wooded land with mangrove vegetation. |
| ...of which planted (<i>sub-category</i>) | Mangroves predominantly composed of trees established through planting. |

Tier Criteria

| Category | Tier for status | Tier for reported trend |
|--|---|--|
| Primary forest/Other naturally regenerated forest/Planted forest | <p>Tier 3 : Data sources: Recent (less than 10 years) National Forest Inventory or remote sensing with ground truthing or data provided by official agencies or programme for repeated compatible NFIs</p> <p>Tier 2 : Data sources: Full cover mapping/ remote sensing or old NFI (more than 10 years) Tier 1 : Other</p> | <p>Tier 3 : Estimate based on repeated compatible tiers 3 (tier for status) Tier 2 : Estimate based on repeated compatible tier 2 or combination tier 3 and 2 or 1 (tier for status) Tier 1 : Other</p> |

2.5 Comments

| Category | Comments related to data definitions etc | Comments on reported trend |
|-------------------------------------|--|--|
| Primary forest | The area of protected areas has been increased | The area of protected areas has been increased |
| Other naturally regenerating forest | N/A | N/A |
| Planted forest | N/A | N/A |
| Mangroves | N/A | N/A |

Other general comments to the table

Together with cadastre agencies the data of forestry organizations clarified and with this regard there are some differences between 2005 and 2010 on "other naturally regenerated forests"

3. What are the stocks and growth rates of the forests and how have they changed?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

3.1 Categories and definitions

| Category | Definition |
|--------------------------------|--|
| Growing stock | Volume over bark of all living trees with a minimum diameter of 10 cm at breast height (or above buttress if these are higher). Includes the stem from ground level up to a top diameter of 0 cm, excluding branches. |
| Net Annual Increment (NAI) | Average annual volume of gross increment over the given reference period less that of natural losses on all trees, measured to minimum diameters as defined for "Growing stock". |
| Above-ground biomass | All living biomass above the soil including stem stump branches bark seeds and foliage. |
| Below-ground biomass | All biomass of live roots. Fine roots of less than 2 mm diameter are excluded because these often cannot be distinguished empirically from soil organic matter or litter. |
| Dead wood | All non-living woody biomass not contained in the litter either standing lying on the ground or in the soil. Dead wood includes wood lying on the surface dead roots and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country. |
| Carbon in above-ground biomass | Carbon in all living biomass above the soil including stem stump branches bark seeds and foliage. |
| Carbon in below-ground biomass | Carbon in all biomass of live roots. Fine roots of less than 2 mm diameter are excluded because these often cannot be distinguished empirically from soil organic matter or litter. |
| Carbon in dead wood | Carbon in all non-living woody biomass not contained in the litter, either standing, lying on the ground, or in the soil. Dead wood includes wood lying on the surface, dead roots and stumps larger than or equal to 10 cm in diameter or any other diameter used by the country. |
| Carbon in litter | Carbon in all non-living biomass with a diameter less than the minimum diameter for dead wood (e.g. 10 cm) lying dead in various states of decomposition above the mineral or organic soil. |
| Soil carbon | Organic carbon in mineral and organic soils (including peat) to a soil depth of 30 cm. |

3.5 Comments on growing stock biomass and carbon

| Category | Comments related to data definitions etc | Comments on the reported trend |
|---|--|--------------------------------|
| Total growing stock | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |
| Growing stock of broadleaved coniferous | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |
| Growing stock composition | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |
| Net annual increment | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |
| Above-ground biomass | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |
| Below-ground biomass | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |
| Dead wood | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |

| | | |
|--------------------------------|--|-----|
| Carbon in above-ground biomass | The data for 2015 has been specified according to the statistical report. There is assumption that data for previous years were not so precise | N/A |
| Carbon in below-ground biomass | N/A | N/A |
| Carbon in dead wood | N/A | N/A |
| Carbon in litter | N/A | N/A |
| Soil carbon | N/A | N/A |

Other general comments to the table

Forests in Uzbekistan are characterized as the 1st category forests (i.e. have mainly the protective function). The species mostly distributed in the forests of Uzbekistan are saxaul (*Haloxylon* spp.) and juniper (*Juniperus* spp.). The saxaul is a desert tree, this species is not high with rather small diameter of trunk. In the past in 1960th it was classified as a bush, and later was transferred to the category of trees. Juniper is characterized with very slow growth. Six-year juniper trees can reach only one meter of height. This is one of the reasons why they cannot be restored easily in the mountain areas of the country

4. What is the status of forest production and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

4.1 Categories and definitions

| Term | Definition |
|--------------------------------|---|
| Primary designated function | The primary function or management objective assigned to a management unit either by legal prescription documented decision of the landowner/manager or evidence provided by documented studies of forest management practices and customary use. |
| Non wood forest product (NWFP) | Goods derived from forests that are tangible and physical objects of biological origin other than wood. |
| Commercial value of NWFP | For the purpose of this table, value is defined as the commercial market value at the forest gate. |
| Category | Definition |
| Production forest | Forest area designated primarily for production of wood, fibre, bio-energy and/or non-wood forest products. |
| Multiple use forest | Forest area designated for more than one purpose and where none of these alone is considered as the predominant designated function. |
| Total wood removals | The total of industrial round wood removals and woodfuel removals. |
| ...of which woodfuel | The wood removed for energy production purposes, regardless whether for industrial, commercial or domestic use. |

4.2 National data

4.2.1 Data sources

| | References to sources of information | Variables | Years | Additional comments |

Other general comments to the table

There is no data on the wild honey in Uzbekistan. With this regard, only the data on natural honey which was produced in the forestry sector has been included

5. How much forest area is managed for protection of soil and water and ecosystem services?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

5.1 Categories and definitions

| Category | Definition |
|--|--|
| Protection of soil and water | Forest area designated or managed for protection of soil and water |
| ...of which production of clean water (<i>sub-category</i>) | Forest area primarily designated or managed for water production, where most human uses are excluded or heavily modified to protect water quality. |
| ...of which coastal stabilization (<i>sub-category</i>) | Forest area primarily designated or managed for coastal stabilization. |
| ...of which desertification control (<i>sub-category</i>) | Forest area primarily designated or managed for desertification control. |
| ...of which avalanche control (<i>sub-category</i>) | Forest area primarily designated or managed to prevent the development or impact of avalanches on human life assets or infrastructure. |
| ...of which erosion, flood protection or reducing flood risk (<i>sub-category</i>) | Forest area primarily designated or managed for protecting communities or assets from the impacts of erosion riparian floods and landslides or for providing flood plain services. |
| ...of which other (<i>sub-category</i>) | Forest area primarily designated or managed for other protective functions. |
| Ecosystem services, cultural or spiritual values | Forest area primarily designated or managed for selected ecosystem services or cultural or spiritual values. |
| ...of which public recreation (<i>sub-category</i>) | Forest area designated or managed for public recreation. |
| ...of which carbon storage or sequestration (<i>sub-category</i>) | Forest area designated or managed for carbon storage or sequestration. |
| ...of which spiritual or cultural services (<i>sub-category</i>) | Forest area designated or managed for spiritual or cultural services. |
| ...of which other (<i>sub-category</i>) | Forest area designated or managed for other ecosystem services. |

6. How much forest area is protected and designated for the conservation of biodiversity and how has it changed over time?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

6.1 Categories and definitions

| Category | Definition |
|------------------------------------|--|
| Conservation of biodiversity | Forest area designated primarily for conservation of biological diversity. Includes but is not limited to areas designated for biodiversity conservation within the protected areas. |
| Forest area within protected areas | Forest area within formally established protected areas independently of the purpose for which the protected areas were established. |

6.2 National data

6.2.1 Data sources

| | References to sources of information | Variables | Years | Additional comments |
|---|---|--------------------------------|------------------------|---------------------|
| 1 | Law on Protected areas of Uzbekistan | Protected area management | 2004 | N/A |
| 2 | Annual Report of the Main Forestry Department Ministry of Agriculture and Water Resources of the Republic of Uzbekistan | Management by forest functions | 1990, 2000, 2005, 2008 | N/A |
| 3 | Distribution of the State Forest Resources as to Land Categories | State forest fund | 1990, 2000, 2005, 2008 | N/A |
| 4 | N/A | N/A | N/A | N/A |

6.2.2 Classification and definitions

| National class | Definition |
|------------------------------------|---|
| - state reserves; | The state reserves are protected natural territories of general public significance with strict regime of protection of natural objects and complexes designated for conservation and study of typical ecological systems, genetic fund of plants and animals. |
| - complex (landscape) sanctuaries; | The complex (landscape) sanctuaries are protected natural territories designated for conservation in natural condition of the natural objects and complexes, which have special ecological value. |
| - natural parks; | The natural parks are protected natural territories designated for conservation and use in nature protection, recreational, scientific and cultural purposes of the natural objects and complexes, which have special ecological, cultural and aesthetic value. |

| | |
|---|--|
| - state natural monuments; | The state monuments of nature are protected natural territories having unique, irreplaceable, valuable natural objects of ecological, scientific, cultural and aesthetic significance. The state monuments of nature are divided into the following types: - hydrological (marsh, lake, river and other) designated for conservation of natural water objects; - botanical, designated for conservation of separate plants; - geomorphologic, designated for conservation of forms of relief created by the nature; - paleontologic, designated for conservation of fossil objects; - geological and mineralogical, designated for conservation of geological and mineralogical formations. |
| - territories for conservation, reproduction and restoration of separate natural objects and complexes; | The territories for conservation, reproduction and restoration of separate natural objects and complexes are created in the form of sanctuaries, natural nurseries and fishery zones. |
| - protected landscapes; | Protected landscapes include resort natural territories, recreational zones, water protected zones, riversides, zones of sanitary protection of water objects and zones of formation of surface and underground waters. |
| - territories for management of separate natural resources. | The territories for management of separate natural resources include the lands of forestry fund, occupied with erosion-preventive woods, city woods, woods around the green zones of the cities, other populated areas and industrial centers, especially valuable woods, woods of walnut-field zones, wood-fruit plantings, woods of scientific or historical significance, as well as land sites of hunting facilities designated for rational use of flora and fauna. |

11. Is there a national platform that promotes stakeholder participation in forest policy development?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

11.1 Categories and definitions

| Category | Definition |
|-------------------------------|---|
| National stakeholder platform | A recognized procedure that a broad range of stakeholders can use to provide opinions, suggestions, analysis, recommendations and other input into the development of national forest policy. |

11.2 National data

11.2.1 Data sources

| | References to sources of information | Years | Additional comments |
|---|--------------------------------------|-------|---------------------|
| 1 | N/A | N/A | N/A |
| 2 | N/A | N/A | N/A |
| 3 | N/A | N/A | N/A |
| 4 | N/A | N/A | N/A |

Table 11

| | |
|---|----|
| Is there a national platform that promotes or allows for stakeholder participation in forest policy development? | no |
|---|----|

11.3 Comments

| Category | Comments related to data definitions etc |
|-------------------------------|--|
| National stakeholder platform | There is no special platform which involves all forest related stakeholders and promotes stakeholder participation in the forest policy development. But, there are some general platforms under Parliament and some ministries which promotes to exchange information between ministries, agencies and NGOs. These platforms do not influence for the forest policy developments significantly. |

13. How does your country measure and report progress towards SFM at the national level?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

13.1 Categories and definitions

| Category | Definition |
|--|--|
| Forest area monitored under a national forest monitoring framework | Forest area monitored by a national monitoring framework or systems that provide measurement based periodic monitoring of forest extent and quality. |
| Forest reporting at national scale | National reporting of forest extent and characteristics that includes some measure of progress toward sustainable forest management. |

13.2 National data

13.2.1 Data sources

| | References to sources of information | Variables | Years | Additional comments |
|---|---|--------------------------|-----------|---------------------|
| 1 | National report on Environmental protection of Uzbekistan | Environmental protection | each year | N/A |
| 2 | National report of the State cadastre of land resources, state cadastre and cartography | Land management | each year | N/A |
| 3 | N/A | N/A | N/A | N/A |
| 4 | N/A | N/A | N/A | N/A |

13.2.2 Classification and definitions

| National class | Definition |
|-------------------------|--|
| National reporting | Main Department of forestry provides reports to the Cabinet of Ministers and the Parliament on the sustainable forest management every year |
| Intersectoral reporting | Main Department of forestry provides reports to the State statistical agency, State Committee on Land Resources, State cadastre and cartography and State Committee on Nature Protection concerning sustainable forest management activities |
| Sectoral reporting | Main Department of forestry provides reports to the Ministry of Agriculture and Water Resources on the implementation of the forestry programmes in the country |
| N/A | N/A |

17. How much money do governments collect from and spend on forests?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

17.1 Categories and definitions

| Category | Definition |
|--------------------------------|---|
| Forest revenue | All government revenue collected from the domestic production and trade of forest products and services. For this purpose revenue include: <ul style="list-style-type: none"> • <u>Goods</u> : roundwood; sawnwood; biomass; woodbased panels; pulp and paper and non-wood forest products. • <u>Services</u> : including concession fees and royalties, stumpage payments, public timber sales revenue taxes and charges based on forest area or yield, taxes on domestic trade and export of forest products, special levies on forestry activities and payments into forest related funds, other miscellaneous inspection, licence and administrative fees levied by forest administrations, permit and licence fees for recreation and other forest related activities. |
| Public expenditure on forestry | All government expenditure on forest related activities. |

17.2 National data

17.2.1 Data sources

| | References to sources of information | Variables | Years | Additional comments |

18. Who owns and manages the forests and how has this changed?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

18.1 Categories and definitions

| Category | Definition |
|--|--|
| Public ownership | Forest owned by the State or administrative units of the public administration or by institutions or corporations owned by the public administration. |
| ...of which owned by the state at national scale (<i>sub-category</i>) | Forest owned by the State at the national scale or administrative units of the public administration or by institutions or corporations owned by the public administration. |
| ...of which owned by the state at the sub-national government scale (<i>sub-category</i>) | Forest owned by the State at the sub-national government scale or administrative units of the public administration or by institutions or corporations owned by the public administration. |
| Private ownership | Forest owned by individuals, families, communities, private cooperatives corporations and other business entities, private, religious and educational institutions, pension or investment funds, NGOs, nature conservation associations and other private institutions. |
| ...of which individuals (<i>sub-category</i>) | Forest owned by individuals and families. |
| ...of which private business entities and institutions (<i>sub-category</i>) | Forest owned by private corporations cooperatives companies and other business entities as well as private nonprofit organizations such as NGOs nature conservation associations, and private religious and educational institutions etc. |
| ...of which local tribal and indigenous communities (<i>sub-category</i>) | Forest owned by a group of individuals belonging to the same community residing within or in the vicinity of a forest area or forest owned by communities of indigenous or tribal people The community members are coowners that share exclusive rights and duties and benefits contribute to the community development. |
| Unknown ownership | Forest area where ownership is unknown includes areas where ownership is unclear or disputed. |
| Categories related to management rights of public forests | Definition |
| Public Administration | The Public Administration (or institutions or corporations owned by the Public Administration) retains management rights and responsibilities within the limits specified by the legislation. |
| Individuals households | Forest management rights and responsibilities are transferred from the Public Administration to individuals or households through long-term leases or management agreements. |
| Private companies | Forest management rights and responsibilities are transferred from the Public Administration to corporations, other business entities private cooperatives, private nonprofit institutions and associations, etc., through long-term leases or management agreements. |
| Communities | Forest management rights and responsibilities are transferred from the Public Administration to local communities (including indigenous and tribal communities) through long-term leases or management agreements. |
| Other form of management rights | Forests for which the transfer of management rights does not belong to any of the categories mentioned above. |

19. How many people are directly employed in forestry?

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

19.1 Categories and definitions

| Category | Definition |
|-----------------------------|--|
| Full-time equivalents (FTE) | A measurement equal to one person working full-time during a specified reference period. |
| Employment in forestry | Employment in activities related to production of goods derived from forests. This category corresponds to the ISIC/NACE Rev. 4 activity A02 (Forestry and logging). |

19.2 National data

19.2.1 Data sources

| | References to sources of information | Variables | Years | Additional comments |
|---|--|------------------------|------------------------|---------------------|
| 1 | Statistical Report 1-T of the Main Forestry Department under the Ministry of Agriculture and Water Resources of the RU | 1990, 2000, 2005, 2008 | 1990, 2000, 2005, 2008 | N/A |
| 2 | N/A | N/A | N/A | N/A |
| 3 | N/A | N/A | N/A | N/A |
| 4 | N/A | N/A | N/A | N/A |

19.2.2 Classification and definitions

| National class | Definition |
|----------------|------------|
| N/A | N/A |
| N/A | N/A |
| N/A | N/A |
| N/A | N/A |

19.2.3 Original data

| | |
|-------------------------|---------------------------------------|
| National classes | Employment (1000 person-years) |
|-------------------------|---------------------------------------|

| | 1990 | 2000 | 2005 | 2008 |
|---|-------|-------|-------|-------|
| Forestry sector and protected area management staff | 5.082 | 6.639 | 6.720 | 7.102 |

19.3 Data

Table 19

| Category | | Employment (000 years FTE) | | | |
|---|------------------------|----------------------------|-------|------|------|
| | | 1990 | 2000 | 2005 | 2010 |
|  | Employment in forestry | 4.482 | 6.039 | 6.07 | 7.1 |
|  | ... of which female | N/A | N/A | N/A | 0.3 |

19.4 Comments

| Category | Comments related to data definitions etc | Comments on the reported trend |
|------------------------|--|--------------------------------|
| Employment in forestry | N/A | N/A |

Other general comments to the table

|--|

21. What is forest area likely to be in the future

Documents for this question:

- [Guide for country reporting FRA 2015](#)
- [FRA 2015 Terms and Definitions](#)

21.1 Categories and definitions

| Category | Definition |
|--|---|
| Government target/aspiration for forest area | Government target/aspiration for forest area for a specific year. |
| Forests earmarked for conversion | Forest area that is allocated/classified or scheduled to be converted into non-forest uses. |

21.2 National data

21.2.1 Data sources

| | References to sources of information | Variables | Years | Additional comments |
|---|--------------------------------------|-----------|-------|---------------------|
| 1 | N/A | N/A | N/A | N/A |
| 2 | N/A | N/A | N/A | N/A |
| 3 | N/A | N/A | N/A | N/A |
| 4 | N/A | N/A | N/A | N/A |

21.3 Data

Table 21a

| Category | Forest area (000 ha) | |
|--|----------------------|--------|
| | 2020 | 2030 |
| Government target/aspiration for forest area | 3400.0 | 3700.0 |

Table 21b

| Category | Forest area (000 ha) |
|----------------------------------|----------------------|
| | 2013 |
| Forests earmarked for conversion | 3219 |

21.4 Comments

| Category | Comments |
|--|----------|
| Government target/aspiration for forest area | N/A |

| | |
|----------------------------------|-----|
| Forests earmarked for conversion | N/A |
|----------------------------------|-----|
